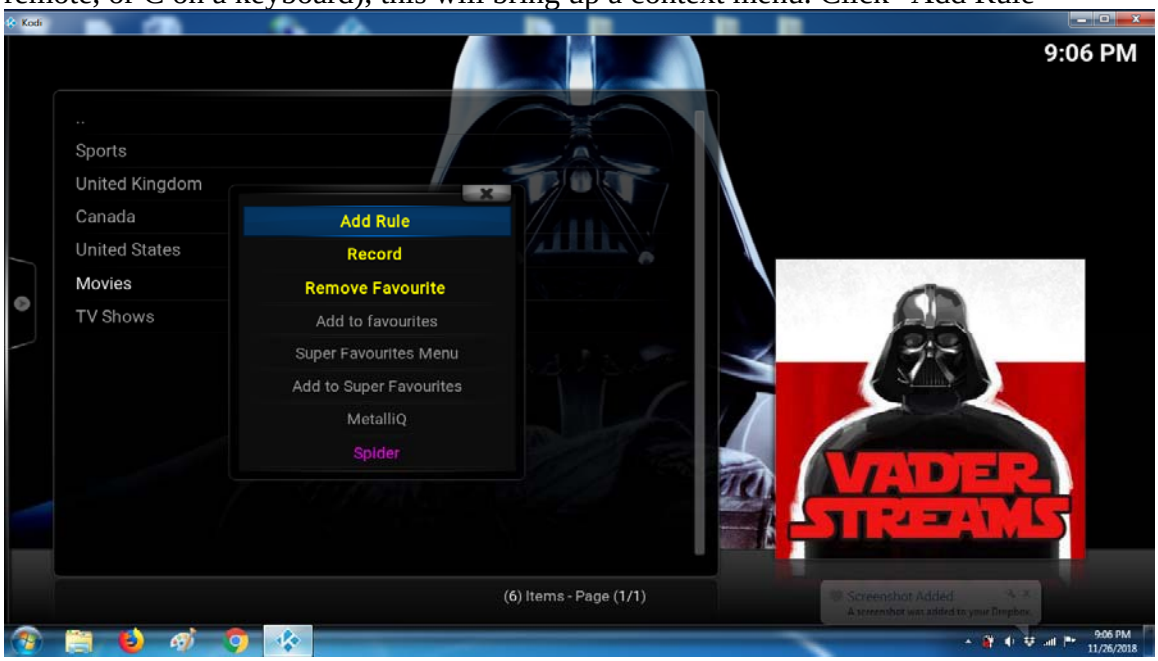
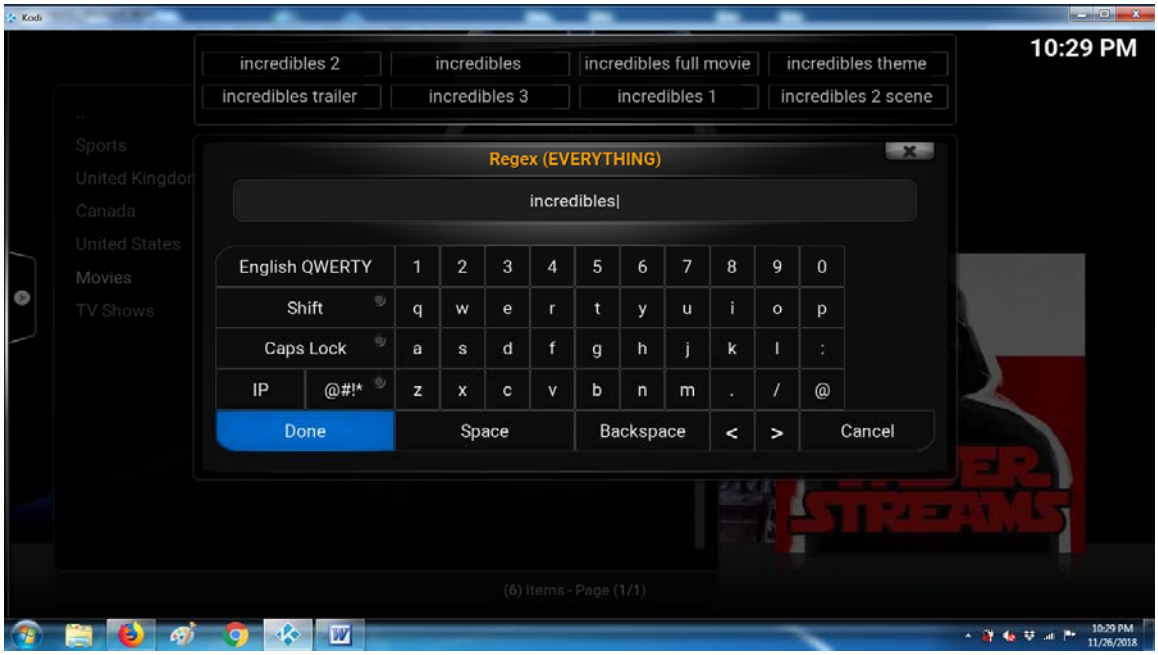
TO ADD A MOVIE TO RECORD

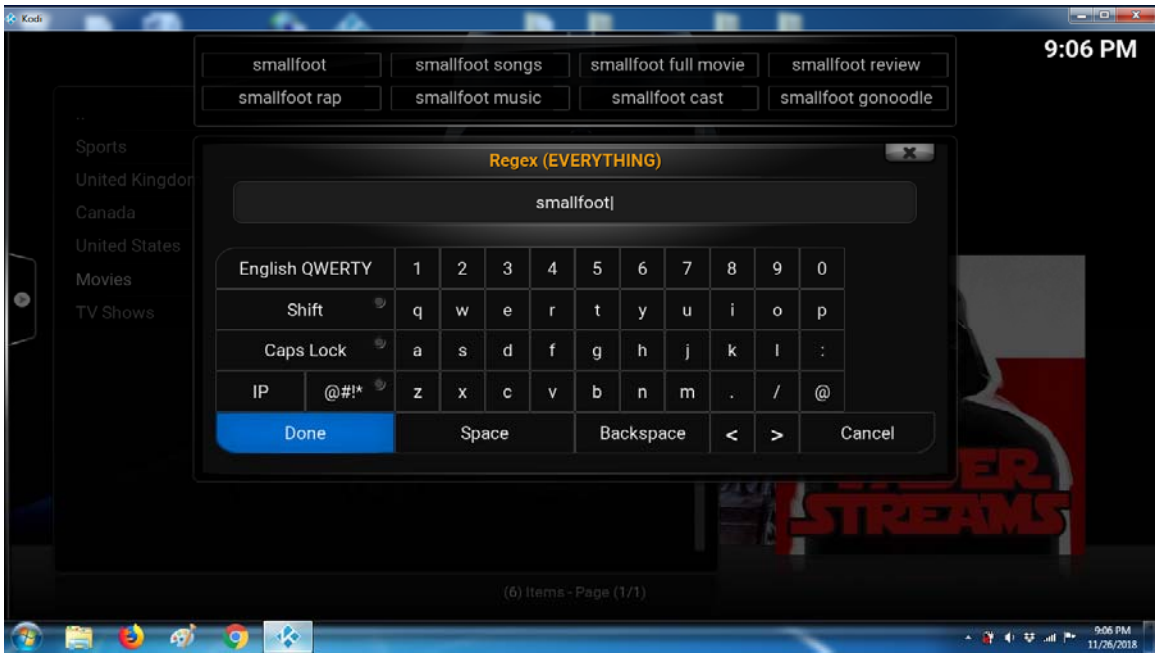
To add a movie to record, scroll down to Movies and then press the Menu key (3 lines on remote, or C on a keyboard), this will bring up a context menu. Click “Add Rule”



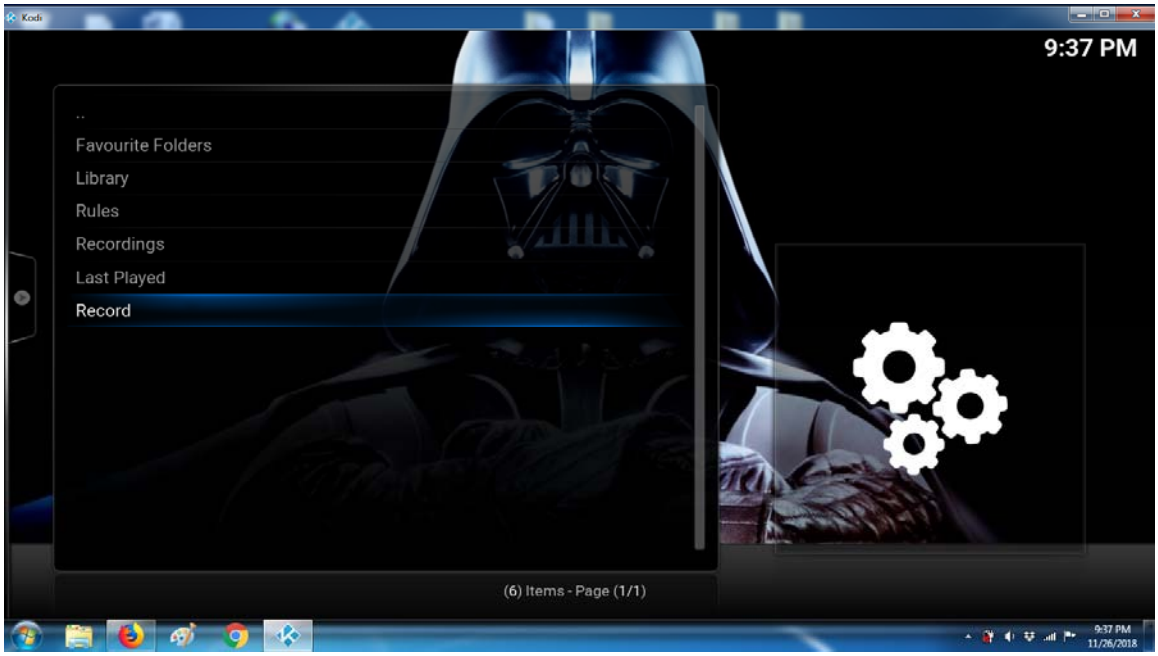
The rule will the name of the movie, for example “Incredibles 2”, so first delete the “.*” from the window, then you could type “incredibles”.
NOTE: If you typed “incredibles 2” then only Incredibles 2 would get recorded. However, if you typed “incredible”, then if available then The Incredibles & Incredibles 2 would be recorded.



If there was a movie that was not yet on Vader for example “Smallfoot” then if you typed “smallfoot” then this movie would record when it was added to Vader.



Recordings will take place automatically at midnight or click the record item in the main list to begin recording.
NOTE: Do not try and watch a show while downloading.



If you click record then you will see a notification on the bottom right of your screen, confirming what is recording.
